

# Navigating Ancestry.com

March 1, 2009

This class will explore the many features and benefits of the Ancestry online service. In addition, participants of this class will learn how to create a tree on Ancestry.com, add photos to their tree, and how to search for and attach records. A great introductory course suitable for those who have never used the website, as well as those who have only used Ancestry.com to search for records but are interested in posting a family tree.
